

Carada Inc.

Company:

- “We produce projection screens and masking systems for use in home theaters, offices, schools and churches.”

Challenge:

- “Our latest masking system product was a single-motor design and was almost ready to release to the market. But before releasing the product we decided to change it to a two-motor design. Using SolidWorks we were able to make all the necessary design changes incredibly fast and the two-motor product was ready to ship just a few weeks later.”

Benefits:

- “Our ideas turn into parts and products MUCH faster!”

“CIP has been exceptional to work with”
