K2 CNC Milling Machines

K2 CNC machines allow for repeatability, reliability, and accuracy. With over 14 years of experience in stepper and servo electronics, automation and linear motion; K2 Device's core mission is to provide a solution and not just a machine. They offer machines in all sizes—4" x 7" to 120" x 60". Need a custom size — not a problem, K2 Devices, can custom build a machine to fit your needs.

**14" x 14" CNC Machine—
KT-1414-09 and KT-1414S-09**
With stepper or servo motor options, this accurate machine can cut thin aluminum, plastics, and wood. This is one of the smaller K2 machines available.

**25" x 14" CNC Machine —
KT-2514-09 and
KT-2514S-09**
With stepper and servo motor options, you can cut thin aluminum, plastics, and wood and is great for fine inlay work.

**39" x 25" CNC Machine
KG-3925-G**
Applications include: sign making, furniture making (legs, inlays, corbels), guitars, engraving, plastic cutting, ply wood, and light non ferrous metal cutting.

50" x 50" CNC Router KG-5050
Applications: wood routing, cabinet, sign and furniture making, guitars, engraving, vinyl sticker & plastic cutting, light metal milling, and 3D photo carving, wood / foam mold making.

**98" x 50" CNC Router
KG-9850**
Applications: wood routing, cabinet, sign, & furniture making, guitars, engraving, vinyl sticker & plastic cutting, light metal milling, and 3D photo carving, wood / foam mold making.

**120" x 60" CNC Router
KG-12060**
Cut capacity/Material:
plastic, foam, wood, circuit board, and light aluminum
